Common WebLogic Interview Questions for Freshers

Interviewers typically assess your theoretical knowledge, problem-solving skills, and sometimes practical

experience with WebLogic. Below are some of the frequently asked questions along with explanations to help you prepare better.

1. What is WebLogic Server?

This is often the opening question. You should explain that WebLogic Server is an application server developed by Oracle that supports the deployment and management of Java EE applications. Mention its role in hosting enterprise applications and enabling features like clustering, security, and transaction management.

2. What are the main components of WebLogic architecture?

Discuss the Admin Server, Managed Servers, Node Manager, and clusters. Explain that the Admin Server controls the configuration and management of the domain, while Managed Servers host the deployed applications. Node Manager helps in starting and stopping servers remotely.

3. What is a WebLogic domain?

A domain is the basic administrative unit in WebLogic. It consists of an Admin Server and one or more Managed Servers. Domains allow grouping and managing related WebLogic resources logically.

4. How do you deploy an application in WebLogic?

Explain the deployment process briefly — either through the WebLogic Server Administration Console, WLST (WebLogic Scripting Tool), or via command line. Mention common deployment units like EAR (Enterprise Archive), WAR (Web Archive), and JAR (Java Archive).

5. What is Node Manager in WebLogic?

Node Manager is a utility used for controlling the life cycle of WebLogic Server instances. It can start, stop, and restart Managed Servers remotely, which is crucial in clustered environments.

6. Explain clustering in WebLogic.

Clustering involves grouping Managed Servers to provide scalability and high availability. It allows load balancing and failover, ensuring applications remain accessible even if some servers fail.

7. What is the difference between a Managed Server and Admin Server?

Admin Server handles domain-wide administration, configuration, and deployment, while Managed Servers host the actual business applications and handle runtime

operations.

8. How can you monitor a WebLogic Server?

You can monitor WebLogic using the Administration Console, JMX (Java Management Extensions), WLST scripts, or third-party monitoring tools. Metrics like JVM health, thread usage, and connection pools are commonly tracked.

9. What is a JDBC data source in WebLogic?

A JDBC data source is a configured connection pool that allows WebLogic applications to connect to relational databases efficiently.

10. How do you configure security in WebLogic?

WebLogic provides security realms, users, groups, and roles to manage authentication and authorization. You can integrate LDAP servers and configure SSL for secure communication.

Tips for Freshers Preparing for WebLogic Interviews

Getting familiar with interview questions is only part of the preparation. Here are some valuable tips to help you approach your WebLogic interview confidently:

1. Hands-on Practice

If you haven’t already, try to get your hands on the WebLogic Server installation and practice basic tasks like starting/stopping servers, deploying sample applications, and exploring the Admin Console. Practical experience is a huge advantage.
