Nadiya Shah's astrology horoscope for Leo in June highlights a blend of passion, introspection, and action, driven primarily by the Sun's transit and other planetary influences.

The Role of the Sun and Its Impact on Leo

As the Sun rules Leo, its positioning is always a crucial factor in any horoscope reading for this sign. In June 2019, the Sun moved from Gemini into Cancer on June 21, signaling a shift from a more communicative and social energy to a nurturing and emotionally driven phase. This transition meant that Leos were encouraged to balance their natural confidence and outward charisma with deeper emotional connections and self-care. Nadiya Shah points out how this period invited Leos to tap into their inner sensitivity without losing their characteristic boldness. The Sun's journey encouraged self-reflection, especially in matters of family and home life, fostering a harmonious blend of outward strength and inward warmth.

Influence of Mercury and Venus

Mercury, the planet of communication, was retrograde in Gemini for the first half of June, which may have caused some miscommunications or delays in plans for Leos, especially regarding travel, contracts, or social engagements. Shah advises patience during this period, suggesting that it was a good time to revisit and revise rather than push forward aggressively. Venus's transit through Gemini and then Cancer during the month also played a significant role. Venus brought charm and allure to Leo's social life, enhancing romantic prospects and friendships. However, with Venus entering Cancer mid-month, emotional depth in relationships became more pronounced, urging Leos to express vulnerability and nurture their close bonds.
