What Is the IH 56 Planter?

Before diving into the specifics of the parts diagram, it's helpful to know what the IH 56 planter actually is. Manufactured by International Harvester, the IH 56 is a row crop planter designed primarily for small grains, corn, and soybeans. It's known for its durability and relatively straightforward mechanical design, making it popular among small to medium-sized farms. The planter is usually pulled behind a tractor and features multiple row units that place seeds into prepared soil at consistent depths and spacing.

Why the IH 56 Planter Parts Diagram Matters

Having an IH 56 planter parts diagram at your disposal is like having a road map for your machine. The diagram visually breaks down every component, from the seed hoppers to the closing wheels, providing a clear picture of how the planter fits together. This is especially helpful when ordering replacement parts, diagnosing mechanical issues, or performing routine maintenance.

Benefits of Using the Parts Diagram

1. **Accurate Identification:** Quickly pinpoint the exact part you need without confusion.
2. **Efficient Repairs:** Understand how parts interact, which helps in troubleshooting.
3. **Proper Assembly:** For those restoring or rebuilding, the diagram ensures components go back in the right place.
4. **Cost Savings:** Avoid buying unnecessary parts by knowing precisely what's worn or broken.

Key Components Highlighted in the IH 56 Planter Parts Diagram

The IH 56 planter consists of several critical parts, each playing a specific role in the planting process. The parts diagram typically breaks these down into sections for clarity.

1. Seed Metering Mechanism

At the heart of the planter’s function, the seed metering system controls how seeds are picked up and dropped into the seed furrow. The diagram shows the seed plates, vacuum or mechanical meters, and related gears that ensure seeds are spaced evenly. Understanding this part of the diagram helps when calibrating your planter or replacing worn seed plates.

2. Seed Hopper and Seed Delivery System

The seed hopper holds the seeds before planting. The parts diagram will illustrate the hopper’s shape, lid, and any agitators that prevent seed clumping. The delivery tubes and boots that guide seeds from the hopper into the soil are also highlighted, showing how gravity and mechanical movement work together.

3. Furrow Openers

These components cut into the soil to create a trench where the seeds will rest. The IH 56 planter often uses disc openers or double disc openers, which are clearly depicted in the parts diagram. It’s essential to keep these parts sharp and aligned for proper seed placement.

4. Closing Wheels and Press Wheels

After seeds are dropped, closing wheels press the soil back over the seed trench to ensure good seed-to-soil contact. The parts diagram details the types of wheels used, their mounting brackets, and any springs or adjustments involved.

5. Drive Mechanism

The planter’s drive system powers the seed meters and other moving parts through chains, sprockets, and gears. The diagram maps out this complex network, making it easier to identify wear points or broken chains that could halt planting operations.

How to Use the IH 56 Planter Parts Diagram Effectively

Reading a vintage planter’s parts diagram can seem daunting at first, but with a few tips, you can make the most of this resource.

Start with the Big Picture

Begin by looking at the overall schematic to understand how major components connect. This helps you see the flow of seeds from the hopper to the soil.

Focus on One Section at a Time

If you’re repairing the seed metering system, zoom in on that part of the diagram. Most diagrams

are divided into exploded views of assemblies, allowing you to isolate the components you need.

Match Part Numbers When Ordering Replacements

Each component in the IH 56 planter parts diagram is labeled with a part number. Use these numbers when ordering parts from suppliers or salvage yards to avoid mistakes.

Keep a Physical or Digital Copy Handy

During planting season, having the parts diagram accessible on your phone or printed in the tractor cab can save valuable time when issues arise.

Common Issues Identified Through the Parts Diagram

Understanding the parts diagram can also help diagnose common problems with the IH 56 planter.

Uneven Seed Spacing

If seeds are not evenly spaced, the problem often lies in the seed metering components. Checking the seed plates and drive chains via the diagram can pinpoint worn or damaged parts.

Seed Not Dropping Properly

Issues with seed delivery tubes or clogged seed boots are common. The diagram illustrates these parts, making it easier to inspect and clean them.

Closing Wheels Not Functioning Correctly

If soil isn’t closing properly over seeds, the closing wheel assemblies might need adjustment or replacement. The diagram shows spring tensioners and mounting hardware that may require attention.
