These fascinating creatures offer a unique blend of charm, ease of care, and intriguing behaviors that make them excellent companions. If you've ever considered expanding your pet family beyond the usual cats and dogs, skinks—particularly blue tongued skinks and OT (often referring to the Indonesian Blue Tongue Skink or other variants)—are well worth exploring. Let's dive into what makes these lizards special, how to care for them, and why they make such rewarding pets.

Understanding Skinks as Pets

Skinks belong to a large family of lizards that are widely distributed across the globe, known for their smooth, shiny scales and elongated bodies. Among the many species, the blue tongued skink stands out as one of the most popular pet lizards due to its distinctive bright blue tongue and gentle temperament. The term "OT" often pops up in reptile circles and can refer to specific morphs or regional variants of blue tongued skinks, such as the Indonesian Blue Tongue Skink, which have their own unique traits.

What Makes Blue Tongued Skinks Unique?

Blue tongued skinks are medium-sized lizards, typically measuring between 18 to 24 inches in length. Their most notable feature, the vivid blue tongue, is used as a defense mechanism to startle predators, but it also adds to their visual appeal as pets. Unlike many reptiles that can be skittish or aggressive, blue tongued skinks are known for their calm demeanor and tolerance of handling, making them suitable for beginners and experienced keepers alike.

The Variety of Blue Tongued Skinks and OT Types

There are several species and morphs within the blue tongued skink group, each with unique coloration and patterns. The most common species kept as pets include: - **Eastern Blue Tongue Skink (Tiliqua scincoides scincoides):** Native to Australia, known for its sandy brown coloration. - **Indonesian Blue Tongue Skink (Tiliqua gigas):** Larger and more arboreal, often referred to as OT in reptile communities. - **Northern Blue Tongue Skink:** Slightly smaller with darker coloring. These variations offer reptile keepers a chance to select a skink that fits their aesthetic preferences and space considerations.

Why Choose Skinks Lizards as Pets Blue Tongued Skinks and OT?

If you're on the fence about adopting a skink, here are several compelling reasons why these reptiles make great pets.

Gentle Nature and Interaction

Blue tongued skinks are well known for their docile nature. While some reptiles may dart away or bite when handled, blue tongued skinks often tolerate and even enjoy interaction. With regular, gentle handling, they can become quite accustomed to human presence, making them ideal for pet owners who want an engaging yet low-maintenance reptile.

Relatively Easy to Care For

Compared to other reptiles like chameleons or certain exotic snakes, skinks are fairly straightforward to care for. They have simple dietary needs and don't require overly complex environmental setups. This ease makes them appealing to both beginners and busy pet owners who want a rewarding pet without excessive fuss.

Long Lifespan

One of the often overlooked benefits of keeping blue tongued skinks is their longevity. With proper care, these lizards can live up to 20 years or more, allowing pet owners to enjoy a long-term bond with their reptile companion.

Essential Care Tips for Skinks Lizards as Pets Blue Tongued Skinks and OT

Providing a happy and healthy environment for your skink is key. Here's what you need to know to get started.

Housing Requirements

A spacious enclosure is vital. For an adult blue tongued skink, a tank size of at least 40 gallons is recommended, but larger is always better. The enclosure should include:

1. A secure lid to prevent escapes
2. Substrate that mimics their natural habitat, such as aspen shavings or cypress mulch
3. Hiding spots created with logs, caves, or commercial reptile hides
4. A basking area with a heat lamp to maintain temperatures between 95-105°F
5. A cooler end of the tank around 75-85°F to allow thermoregulation

Humidity should be moderate, typically between 40-60%, which can be managed with occasional misting and a water dish.

Diet and Nutrition

Blue tongued skinks are omnivores, meaning they eat both animal and plant matter. Their diet should be balanced and varied to ensure proper nutrition. Typical foods include:

1. High-quality insects like crickets, mealworms, and roaches
2. Fresh vegetables such as collard greens, squash, and carrots
3. Fruits like berries and melons in moderation
4. Commercially prepared blue tongued skink diets available from specialty pet stores

Calcium and vitamin supplements are important to prevent metabolic bone disease, especially for captive reptiles.

Handling and Socialization

Start handling your skink gently and gradually to build trust. Avoid sudden movements, and always support their body fully to make them feel secure. Blue tongued skinks generally tolerate handling well, but every individual is different, so pay attention to your pet's comfort levels.

Health Considerations and Common Challenges

Like all pets, skinks can face health issues, but with proper care, these can be minimized.

Signs of a Healthy Skink

A healthy blue tongued skink will have bright, clear eyes, smooth skin, and a good appetite. They should be alert and active during their waking hours.

Common Health Problems

- **Respiratory infections:** Often caused by improper humidity or temperature. - **Metabolic bone disease:** Due to calcium deficiency. - **Parasites:** Internal and external parasites can affect skinks, especially if hygiene is not maintained. - **Shedding issues:** Inadequate humidity can lead to retained shed. Regular veterinary check-ups with a reptile-savvy vet help catch and treat problems early.

Blue Tongued Skinks as Pets

Physical Characteristics and Behavior

Blue tongued skinks are medium-sized lizards, typically measuring between 18 to 24 inches in length. Their robust bodies and relatively docile temperament make them suitable for captivity. These skinks are known for their calm demeanor, often tolerating handling better than many other reptile species. The iconic bright blue tongue is not just an aesthetic feature but a defensive display, which can startle potential threats.

Habitat and Enclosure Requirements

Creating a suitable habitat for blue tongued skinks is pivotal for their health and well-being. They thrive in terrariums that mimic their natural environment, which includes ample substrate for burrowing, hiding spots, and basking areas. A terrarium size of at least 40 gallons is recommended for an adult skink, providing enough space for movement. Temperature gradients are crucial; a basking spot should reach 95°F (35°C), while the cooler end of the enclosure should be around 75°F (24°C). UVB lighting is necessary to facilitate vitamin D3 synthesis, essential for calcium metabolism and bone health. Humidity levels should be moderate, around 40-60%, to replicate their semi-arid to woodland habitats.

Diet and Nutrition

Blue tongued skinks are omnivorous, consuming a varied diet that includes vegetables, fruits, insects, and occasional lean protein. In captivity, a balanced diet typically consists of:

1. Leafy greens such as collard greens and dandelion leaves
2. Vegetables like squash and carrots
3. Fruits including berries and melons in moderation
4. Protein sources such as crickets, earthworms, and lean cooked meats

Commercially available skink diets can supplement fresh food. Care must be taken to avoid excessive fatty foods or high sugar content, which can lead to health issues such as obesity or metabolic bone disease.

Other Skink Species (OT) as Pets

Exploring Various Skink Species

Beyond blue tongued skinks, the skink family encompasses many species often kept in captivity. For instance, the African fire skink (**Lepidothyris fernandi**) is notable for its vivid coloration and active behavior. The term "OT" in the context of skinks lizards as pets blue tongued skinks and ot may also align with other popular species that are less mainstream but nonetheless captivating. Each species requires an individualized approach to care, reflecting their native habitat's climate and dietary habits.

Comparative Care and Temperament

When comparing blue tongued skinks to other skinks, various factors emerge:

1. **Size:** Blue tongued skinks are medium-sized, while some OT skinks like the Solomon Islands skink are significantly larger.
2. **Temperament:** Blue tongued skinks tend to be more docile and tolerant of handling; some OT skinks may be more skittish or aggressive.
3. **Habitat needs:** Terrestrial vs. arboreal species require different enclosure setups, including vertical climbing space for arboreal skinks.
4. **Diet:** While most are omnivorous, some OT species may have more specialized dietary requirements.

These differences highlight the importance of species-specific research before acquiring a skink as a pet.

Pros and Cons of Keeping Skinks as Pets

2. **Docile nature:** Their calm temperament makes them suitable for beginners and families.
3. **Longevity:** Blue tongued skinks can live up to 20 years in captivity with proper care, offering a long-term companionship.
4. **Unique appearance:** Their distinctive coloration and blue tongues provide aesthetic appeal.

Challenges

1. **Space requirements:** Larger skinks need sizable enclosures, which can be a limitation for some owners.
2. **Temperature and humidity control:** Maintaining the correct environmental parameters demands investment in equipment.
3. **Diet complexity:** A varied diet that includes live insects and fresh produce requires commitment and knowledge.
4. **Potential health issues:** Without proper UVB lighting and nutrition, skinks can suffer from metabolic bone disease and other ailments.

Legal and Ethical Considerations

Prospective owners should be aware of the legalities surrounding skink ownership. Regulations vary by country and region, with some species protected or restricted. Additionally, the ethical sourcing of skinks is critical; captive-bred individuals are preferable to wild-caught specimens to support conservation efforts and reduce ecological impact.
