Questions & Answers About optics by brijlal and subramanyam river place

No	Question	Answer
1	What topics are covered in the 'Optics' chapter by Brijlal and Subramanyam for Class 12 Physics?	The 'Optics' chapter covers topics such as reflection and refraction of light, laws of reflection and refraction, total internal reflection, optical instruments, wave optics including interference, diffraction, and polarization.
2	How is the concept of total internal reflection explained in Brijlal and Subramanyam's Optics chapter?	Total internal reflection is explained as the phenomenon where light traveling from a denser medium to a rarer medium hits the interface at an angle greater than the critical angle and reflects entirely within the denser medium, without any refraction.

3	What are the key differences between reflection and refraction as described in Brijlal and Subramanyam's Optics?	Reflection occurs when light bounces back from a surface into the same medium, following the law of reflection. Refraction is the bending of light as it passes from one medium to another with different optical density, following Snell's law.
